# How to fight poverty the next 5 years years

## The Millennium Declaration set 2015

as the target date for achieving most of the Millennium Development Goals (MDGs), which established quantitative benchmarks to halve extreme poverty in all its forms. As the date approaches, less than five years away, the world finds itself mired in an economic crisis that is unprecedented in its severity and global dimensions.

The effects of climate change are becoming increasingly apparent, with a potentially devastating impact on countries rich and poor. Today, more than ever, the commitment to building the global partnership embodied in the Millennium Declaration must guide our collective actions.

In 2009, an estimated 55 million to 90 million more people will be living in extreme poverty than anticipated before the crisis. Likewise, the encouraging trend in the eradication of hunger since the early 1990s was reversed in 2008, largely due to higher food prices.

*The prevalence of hunger in the developing regions is now on the rise, from 16 per cent in 2006 to 17 per cent in 2008. (fra FNs 2009-rapport)*

**In his paper to the conference, Erik Reinert** ends by citing Nobel Economics Laureate Gunnar Myrdal, who advised Third World leaders on the subject of economic theory. He stated that: "They should be aware of the fact that very much of these theories are partly rationalizations of the dominant interest in the advanced and rapidly progressing industrial countries...it...would be pathetic if the young social scientists of the under-developed

countries got caught in the predilections of the thinking in the advanced countries, which are hampering the scholars there in their efforts to be rational but would be almost deadening to the intellectual strivings of those in the under-developed countries. I would instead wish them to have the courage to throw away large structures of meaningless, irrelevant and sometimes blatantly inadequate doctrines and theoretical approaches and to start out from fresh thinking right from their needs and their problems. This would then take them far beyond the realm of both out-moded Western liberal economics and Marxism."

### Deltakere

**Salil Shetty** er direktør for FNs tusenårsmålskampanje

**Hege Hertzberg** er utviklingspolitisk direktør i Utenriksdepartementet. Hun har lang fartstid fra NORAD.

**Charles Abugre** er leder for kampanjens afrikasatsning med hovedkontor i Nairobi med flere regions- og landkontorer. Han er økonom og bl.a tidligere leder for Christian Aids policy-avdeling

**Ingrid Fiskå** er statsekretær i Utenriksdepartementet for utviklingssaker.

**Stefan de Vylder** er svensk utviklingsøkonom med bred erfaring fra svensk bistandsarbeid.

**Erik Reinert** er professor i økonomi, forfatter og leder i nettverket The Other Canon, og med i regjeringens økonomiutvalg har laget bakgrunnsdokument om MDGene.

**Representanter for partiene og organisasjoner vil også delta.**
